Incoming President's Message:

I have worked in Sandia's internal audit organizations since 2010. As an ESH auditor, I have led several high-profile audits and consulting engagements in the areas of safety culture, explosive safety, work

planning & control, and construction safety oversight. Prior to joining the Audit Center, I served as a Division ES&H/S&S coordinator.

Before Sandia, I held several manager and staff ES&H

performance assurance positions within the DOE complex. I have a Master of Science in Industrial Safety and am a Certified Safety Professional.

Marc Evans, CSP

Incoming Vice President's Message:

Greetings fellow safety professionals!

I follow the path as many of you have, working most of my adult life in operational and technical roles and taking the safety fork in the road later in life, after learning its value tenfold over previous roles and positions. I personally came to this fork in 2011, when the career that I loved so much in manned spaceflight came to an abrupt, but foreseeable, end; however, when I got to that directional choice, it had already been informed over the previous ten years through training and voluntary assignments that I sought out, knowing the path that I was eventually going to take. This is one of the beauties

of the safety profession, true? Many of us start out as young, adventurous, and full of drive, and we typically learn through mishaps and accidents (minor, we hope) along the way that help us to mature as working professionals and eventually begin to "get" what all the corporate and jobsite safety "stuff" is really intended to be—a way for us to go home each and every day with our fingers, our lives, and our coworkers who we grow to be close friends with. Oh, and help our employer stay in business!

So with that lead-in, let me humbly say that I am really excited to keep learning and growing, as a "mature worker who gets the safety stuff", and do

it with an incredible group of like-minded people—YOU! Becoming a CSP was certainly an important and meaningful step in my career, but as with any certification, national standard, safety rule, or even that advice you hear before an accident ("man, I wouldn't do that if I were you"), it means nothing without APPLYING it, as in CONTRIBUTING. This is what has led me to you good people and becoming involved in my local ASSP chapter. I look forward to meeting and getting to know each one of our stellar members and officers, and of giving to this great profession that has shepherded me into my "greybeard" years of professionalism. Cheers to all!

Tim Riley, CEP, CSP, PMP

Incoming Treasurer's Message:

I am an Environmental, Safety & Health Coordinator at Sandia National Laboratories. Throughout my career, I've been able to travel the country and work in various market sectors, including R&D laboratories, government, construction, and private industry. Two of my most notable positions were working as a contractor and

supporting NASA Goddard Space Flight Center in Greenbelt, MD, where I was a Safety Engineer. In addition, I've worked for Fortis Construction (general contractor) as a Senior Safety Engineer in the development of Facebook's Data Center in Los Lunas, NM.

I have held various positions on the Executive Board, served as

an Ambassador for SeminarFest in Las Vegas, NV, and the national Professional Development Conference (PDC) in Denver, CO.

I received a Bachelor's Degree in Organizational Communications from the University of New Mexico, and I am a Certified Safety Professional.

**Incoming Secretary's Message:**

I am continuing my role as the New Mexico Chapter Secretary of the ASSP. I am a former NM Chapter President and have been a member of the chapter since 2005. My professional role is an Environmental, Safety & Health Coordinator (ES&H) at Sandia National

Labs, and I have worked in the ES&H industry for over 30 years while serving the military, private, and government sectors. I hold a Certified Safety Professional credential, a Master's degree in Industrial Safety Management from Central Missouri State University, and an

MBA in Human Resource Management from the University of Phoenix. I am a retired Chief Master Sergeant of the U. S. Air Force, and I have lived in Albuquerque, NM since 1992.

Gary Wright, MS, CSP

**Incoming Membership's Message:**

I am a health and safety professional with Sandia National Laboratories, assisting the workforce with regulatory compliance, educating the workforce, and aiding in delivery of a strong safety message within the corporation.

I believe that a dynamic safety culture with personal

ownership of safety and an overarching support structure provides the best opportunity for success and organizational health.

My 15 years of experience encompass industrial exposure and safety assessments, including noise, silica, radiation, and a variety of chemical assessments; hurricane response

activities in support of military housing; and providing training at the corporate, local, and state level on a variety of safety and health topics.

I am a certified industrial hygienist, a certified safety professional, and a certified hazardous materials manager.
